

Nelson Rental Center

Equipment Policy

- Rental customers will be responsible for all damage they cause to Mini Excavator Tracks, Skid Steer Tires and Kubota Tractor.
- These rental units are not designed to be operated on sharp objects such as sharp rocks and metal debris. This will cause cuts and slices in the tracks and tires eventually causing them to fail.
- They also cannot be operated over sharp edges such as curbs. This will cause damage to the internal metal structure of the excavator tracks.
- This type of damage is not covered by the damage waiver.
- ***There is a minimum charge of \$350 for such damage caused to these units and will be imposed at the time of the rental return.***
- ***A cleaning fee of \$150 per hour will be imposed if units are returned dirty and require Nelson Rental Center to perform cleaning.***
- Inspections will be conducted on each unit at the time of delivery and return to determine condition of the entire unit including track and tire condition.
- It is the rental customer's responsibility to be present at the time of delivery and return to confirm condition of the unit and sign the inspection form. If not present the inspection will be performed by a Nelson Rental Center Associate.

If a track should come off during a rental please call and an associate will come out to the site to reinstall the track. Under no circumstances should the rental customer attempt to adjust the track tension. If the track is over-tightened it can lead to track failure.
