

# Is your propane cylinder **SAFE?**

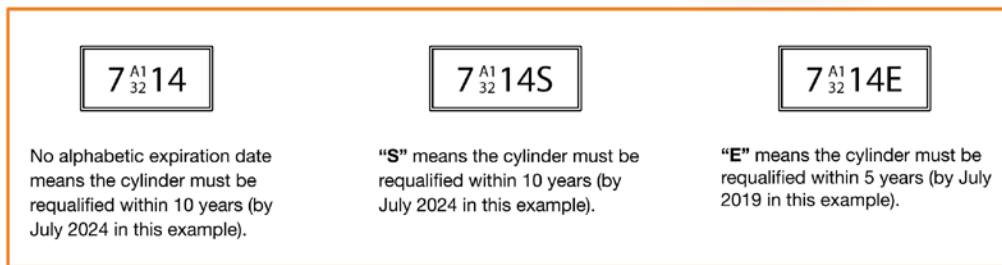

Propane cylinders must be periodically requalified to be safe for use\*. Do not use cylinders that have not been requalified because you risk property damage, severe injuries, or death.

To see if your cylinder is okay to use, look for these markings:

- A Manufacturing Date:**  
Cylinders must be requalified within 10 years of manufacture (in this illustration by May 2015).
- B Requalification Date:**  
If the cylinder is older than 10 years, look for a “requalification date.”

Other possible requalification markings:

U.S. Department of Transportation  
Pipeline and Hazardous Materials Safety Administration  
PHH50-0159-1116

A list of US DOT approved requalifiers and their ID number (RIN) is available on the PHMSA website: <https://portal.phmsa.dot.gov/rinlocator>. See also §173.301
