

Sericea Lespedeza hay is harvested, sun cured and pelletized. No additives or binders are used in this process. Sericea Lespedeza is All Natural and qualifies in all “Natural” programs.

Feeding Sericea Lespedeza can be an effective part of a parasite control program.

Effectiveness in controlling internal parasites has been shown when Sericea Lespedeza is 25% -100% of the animal's total diet. 40%-75% appears to be most effective

Powell's Sericea Lespedeza Pellets

(Patent # 7,615,240 B2)

&

Sericea Lespedeza Commodity Blend

Research proven to aid in the prevention and control of Coccidiosis as well as reducing worm parasite infections in lambs.

Research conducted at Dale Bumpers Small Farm Research Center. Booneville, AR.

Research supported by USDA grants.

Sericea Lespedeza is a natural alternative to commercial anthelmintic.

Research results available at:

Sustainable Agriculture & Research Education (SARE) website

www.sare.org

Sericea Lespedeza hay is harvested from fields cultivated specifically for Sericea Lespedeza production, very little undesirable grasses and weeds are present.

Powell's Sericea Lespedeza pellets are produced under a licensing agreement with Sims Bros. Seed Co. and Auburn University. Patent # US 7,615,240 B2

Sericea Lespedeza (SL) pellets are 12 % protein and 20 % fiber. The pellets are not perfect there will be some "fines" in this feed. No binders or additives are included. This is a good natural source of fiber, protein and bypass protein.

Powell's Sericea Lespedeza Commodity Blend

Powell's Sericea Lespedeza Commodity Blend is a complete feed consisting of Sericea Lespedeza Pellets, Dried Distillers Grains, Soy Hull Pellets, Corn Gluten Pellets and Molasses. This feed offers an economical option for including Sericea Lespedeza in the animal's diet, without the producer needing to purchase multiple feeds that require mixing. This feed is 16% protein, 2.5% fat and 15% fiber. Making it suitable for multiple species as well as multiple application, including adult supplementation, creep feed and maintenance feed.

Feeding 1 lb of Powell's Sericea Lespedeza Commodity Blend will deliver 0.4 lbs of Sericea Lespedeza.

Sericea Lespedeza is just one part of a complete nutritional and parasite management program. All animals should have access to plenty of fresh, clean water. All animals should have plenty of forage. Powell Feed and Milling makes no guarantees of performance based on feeding any of

Sericea Lespedeza hay is ground and pelletized. All natural, no additives

Sericea Lespedeza pellets are 12 % protein and 20 % fiber. The pellets are not perfect there will be some "fines" in this feed. No binders or additives are included. This is a good natural source of fiber, protein and bypass protein.

Research proven to reduce internal parasites.

A patent for a "Method and composition for the control of gastrointestinal parasites in animals"

Patent # US 7,615,240 B2
