**Gas to Propane switch on console**

**Computer Control Module**

**Vaporizer**

A Bi-Fuel conversion means that you are adding a propane fuel supply source to your gasoline powered vehicle; this is known as "Bi-Fuel" technology. You can easily switch back and forth from gasoline to propane fuel on demand. The computer control module allows for greater vehicle performance with computer controlled vapor injection.

Farmington. We can approve one vehicle or a fleet for convenient monthly billing from PIP. Any propane fill station can fill your tank as well.

Propane tanks can be installed as an undermount systems or bed mounted system.

**Use gas or propane to fill up**

### **Cost Savings Benefits**

Propane costs less than gasoline. With propane's lower cost per gallon GGE (gasoline gallon equivalent), you would save approximately 30% per gallon.

### **Increase Engine Life Expectancy**

- Propane burns cleaner than gas, with fewer carbon particulants, resulting is less wear and tear on engine components.
- Less wear and tear extends the life of your truck's engine
- Fewer particulants means fewer oil changes.
- With Integrated Electronic Controls, you will see increased performance.

### **Convenience**

PIP can install a PIP Propane fuel station at your business location at no cost; our supplier partner – Eastern Propane – is offering the PIP group discount to our customers; together we all save.

### **Environmental Benefits**

Safer for the  propane burns Cleaner. Gas creates 20 lbs of Carbon Dioxide (CO<sup>2</sup>) while propane creates 11 lbs of Carbon Dioxide (CO<sup>2</sup>) per GGE.

**Fill your vehicle with clean PIP propane at our location at 67 NH Rt 11 in**
